THRU : Chief, D/S  
Chief, S/TR

Requirements Request

REF : Control Number ORR 10146

1. In conformance with your request the following requirements are forwarded for presentation to source listed under control number ORR 10146:

a. Does source have any further information about new railroad construction in the Chungking area, particularly south from Chungking toward Kuei-yang?

b. Did source notice any transportation shortages in the Chungking area? Was there any indication of congestion of traffic on the railroads or on the Yangtze River? What attempts were made to overcome this congestion if it existed? What effect did the congestion of transportation facilities have on industrial activity in the area concerned?

c. Does source know any statistics of railroad mileage for the nation as a whole or for individual portions of the railroad system.

d. Does source know any operating statistics for railroads for the nation as a whole or for any part of the railroad system.

e. Does source know any over-all freight or passenger traffic figures for the country as a whole, for any part of the country or for individual railroad lines or parts of lines? Figures which are of value include: tons originated, tons hauled, ton-kilometers, carloadings per day, and average length of haul, both for total freight traffic and for individual commodities. Does source know any plan figures for traffic for future periods?

f. Does source know, or could he estimate, any national totals or totals for individual systems or individual centers for freight cars, locomotives, or passenger cars? This would include total inventory, production, repairs, reserves, imports, and exports. Does he know any plan figures for inventory and production for future years?
